

Who Eats Who?

Color-code each organism with the following key:

- Producers=Green
- Herbivores=Pink
- Omnivore=Blue
- Carnivore=Yellow

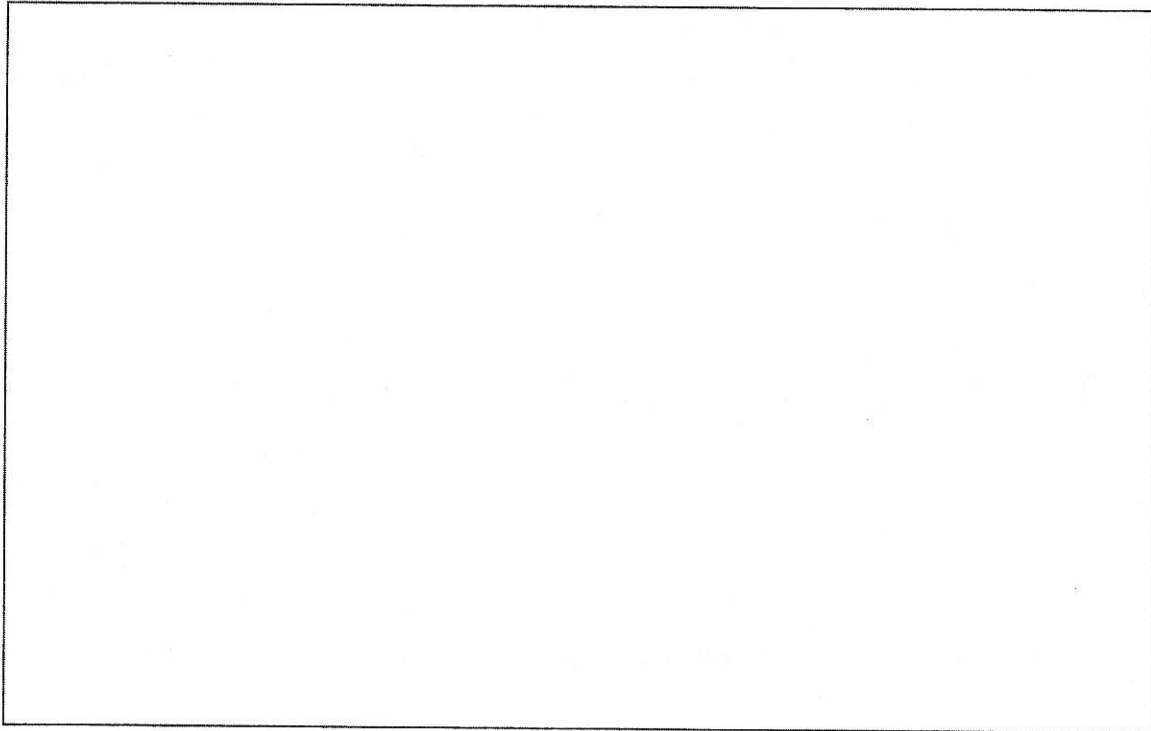

Name _____

1. Describe how you were able to tell what type of organism each was?

2. Which organism(s) is at the top of the food web? How are you able to tell?

Imagine you are on the newest reality show: "Survivor in Space". The host of the show has given you a table explaining where each organism gets its energy from. From the table, create a food web to share with your new castaways. Then, use the box to color code the new organisms just as you did on the front.
(Hint: the ones that don't "eat" anything get their energy from the sun)

Organism	Food Eaten
Marmop	Greengob
Puddit	Greengob, Dipopy,
Alligoat	Dipopy, Puddit
Lemurbird	Marmop, Alligoat, Greengob
Gillypoo	Puddit, Alligoat, Lemurbird
Javapoo	Alligoat, Gillypoo

Color-code each organism with the following key:

- Producers=Green**
- Herbivores=Pink**
- Omnivore=Blue**
- Carnivore=Yellow**
